

Omer Khan Jadoon

Machine Learning Engineer | Agentic AI Software Engineer

+49 (176) 68310746 omerkhanjadoons@gmail.com omerjadoon.com /omerkhanjadoon

Results-driven Machine Learning Engineer with 5+ years of experience in artificial intelligence , data science, machine learning, NLP and MLOps. Proficient in Python, ML/DL, LLM Frameworks and Cloud Deployments.

Technical Skills :

Programming Languages	Python, JavaScript, TypeScript, C / C++, Java, C#
Frameworks & Tools	TensorFlow, PyTorch, LangChain, LlamaIndex, Streamlit, Flask, Django
Generative AI Technologies	Agentic AI, LLMs (Llama3, Mistral, OpenAI, Gemini, Claude), Multimodal LLMs, Audio-to-Audio Models, Video Language Models (VLMs), Diffusion Models, GANs, CrewAI, LangGraph, DeepEval , LangSmith
Databases	Cosmos DB (production), MySQL, MongoDB, PostgreSQL, Firebase, SQL, Vector DBs (ChromaDB, Pinecone)
Deployment Platforms	Azure AI, AWS (EC2, Lambda), Azure Functions, Hugging Face Spaces, MLOps, Docker, Kubernetes, Github,GitLab, Teraform, AWS EKS, LLMOps
AI Techniques	Fine-tuning, RAG, Vector Embeddings, Neural Network Optimization, Prompt Engineering, Knowledge Graphs, LLM & RAG Evaluation
Traditional AI	Computer Vision, NLP, Machine Learning, Deep Learning, DNN
Web Development & AI Workflows	Next.js, Flask, Django, React.js, FastAPI, Make, n8n, Flowise, REST APIs, GraphQL
Project Management & Logs Monitoring Tools	Notion, Jira, Confluence, Agile Development, Grafana Dashboards, Prometheus
Soft Skills	Analytical Thinking, Problem-Solving, Teamwork, Communication, Leadership, Cross-functional Collaboration

Work Experience:

SanaExpert GmbH

Jan 2025 – Present

Artificial Intelligence Specialist

Munich, Germany

- Automation of more than 85% of Customer Support tickets using AI across different countries (Germany, Spain, Italy,Portugal and China) and across different channels (shopify web chat, email, instagram, messenger etc.)
- Designed and deployed **production-grade agentic AI system** with advanced RAG and knowledge graphs, tool calling, and context management, handling sensitive user data with PII masking
- Modern Interactive Sales Agent for Purmeo with text + audio input/output support.
- VLMs, Fine tuning FLUX.dev models (LoRa) for SanaExpert AI Influencer.
- Finetune BioGPT on text based data for medical QA bot.
- AI based Content Generation and Management System with auto posting on all social media channels.

Amidiro GmbH

Dec 2023 – Dec 2024

Generative AI & Machine Learning Consultant

Aachen, Germany

- Lead the Development of Amidiro Audio Assistant which helps businesses/hospitals to provide support and do marketing and support calls using LLMs and which increase the lead conversion rate by 20% , and reduce the call handling time by 15%.
- Fine tuned YOLO v9 on FireNet Dataset and Developed a pipeline to generate Safety & Maintenance Report using LLM.

- Developed a data pipeline to extract important information from Company register (Handelsregister) using OpenAI ChatGPT and store it to AWS DynamoDB.
- Build a Retrieval-augmented generation (RAG) pipeline for Amidiro Internal Knowledgebase to help consultants.
- Developed Basic and Advance Training about Prompt Engineering and RAG focusing on latest research.
- Knowledge retrieval from recent Research Papers and integration into the Knowledgebase.
- Whatsapp based social media content management platform using meta, tiktok APIs and Gemini Flash.

Remote Native GmbH

(Apr 2023 – Oct 2023)

Machine Learning Engineer

Munich, Germany

- Generated Synthetic dataset using LLMs from ~5 Million e-commerce dataset, to train custom BERT model for Named Entity Relations (NER) task.
- Fine Tuned Segment Anything model to do image segmentation and remove background from images. Also created an interface for this in streamlit.
- Developed a Restful API service for converting video of Product to 3D objects.
- Implemented MLOPs pipeline in Azure Databricks to Extract Transform Load (ETL), Model Training and Deployment.

Advance Telecom Services (ATS)

(Jul 2022 – Apr 2023)

Artificial Intelligence Engineer

Remote, USA

- Set up fine-tuning and evaluation pipelines on Microsoft Azure.
- Trained Custom Computer Vision and NLP Models and Deployed them on Azure Cloud.
- Implemented an Advanced Recommendation System for car dealership stores.
- Developed Generative AI Training and conducted training sessions with universities.
- Worked on Data Pipelines, ETL, Batch Scoring, Stream Processing, Visualization using Power BI

National Radio and Telecommunication Corporation (NRTC)

(OCT 2021 – June 2022)

Assistant Manager Artificial Intelligence Lab

Onsite, Pakistan

- Build the AI and BigData Lab with a private cloud for KPK Police, Pakistan.
- Worked on Development of OSINT for Social Media and Criminals Analysis.
- Trained an AI based Forecasting AI to forecast any possible crime in an area.
- Build Interactive Dashboards in Qlik Sense and a custom ETL system for Telecommunication Data.
- Developed Link Analysis Platform to analyze the activities of Terrorist Groups in Pakistan.
- Development of Facial Recognition System (FRS), Automatic Number Plate Recognition System.
- Lead a team of 5 People

Jadoon Technologies Private Limited (JTPL)

(Nov 2020 – OCT 2021)

Lead Software Engineer

Onsite, Pakistan

- Developed Cross Platform Mobile and web apps using Next JS, React JS, ASP.NET as well as Django.
- Web Scraping, Data Analytics, Exploratory Data Analysis.
- Data Ingestion, Training ML and DL based models for visual analysis, emotion detection, and road safety.

Awards & Certifications

Gold Medal/Chancellor Medal: Scored Highest CGPA in my Department

OCT 2020

HEC Scholarship and Laptop Winner: Winner of Merit based Scholarship

March 2018

Education

The University of Haripur

OCT 2016 - OCT 2020

Bachelors of Science in Software Engineering

Haripur, Pakistan
